

STRAIGHT TALK ABOUT SUPERIOR PERFORMANCE.

HERE'S WHAT PUTS THE TYPAR®
WEATHER PROTECTION SYSTEM ON TOP.

THE ELEMENTS HIT HARD. AND SO DO THE FACTS.

The wind, cold, beating sun, and driving rain don't pull any punches. And neither do we. When it comes to defending our position as your strongest choice for safeguarding homes the smart way, the TYPAR® Weather Protection System comes complete with a clear rundown on the reasons we stand above the rest.

No. **1**

HANDS DOWN, THE BEST WARRANTY IN THE INDUSTRY.

It can't be touched. Only the complete TYPAR® Weather Protection System of building wraps, flashings, and construction tape covers you with a lifetime limited system warranty.* It's the backing that using the best deserves.

	LIFETIME LIMITED	PRODUCT	LABOR	MATERIALS
TYPAR®	X	X	X	X
LEADING COMPETITOR		X	X	

*Certain limitations and exclusions apply. See the TYPAR Weather Protection System Limited Warranty located online at TYPAR.com/downloads for full details.

No. **2**

HARDCORE ABILITY TO DELIVER HOLDOUT.

Shutting down water and air infiltration is a primary duty. On both tasks, we excel. TYPAR® BuildingWrap stops moisture from reaching wall cavities and provides a superior level of air blockage. With the whole system at work, gaps, cracks, and wall penetrations are sealed off, too.

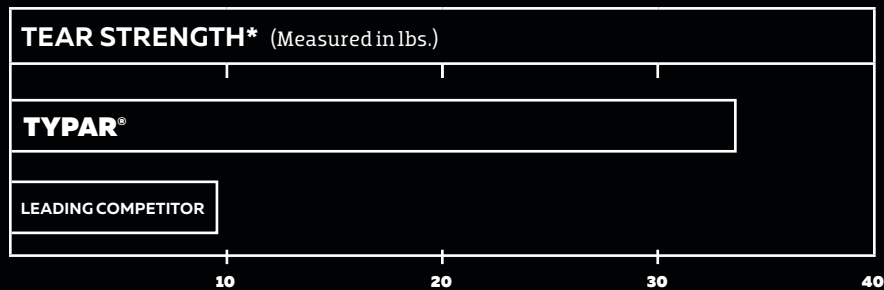

**Based on published results for hydrostatic head test according to AATC127 testing.

No. **3**

UNBEATABLE TEAR STRENGTH.

It kind of makes you sick to see wrap flapping in the breeze. With tear strength that's over five times greater than the leading competition, you can bet TYPAR® BuildingWrap will hold tight to the structure. And, it can better withstand scrapes, ladder abuse, and other jobsite rigors.

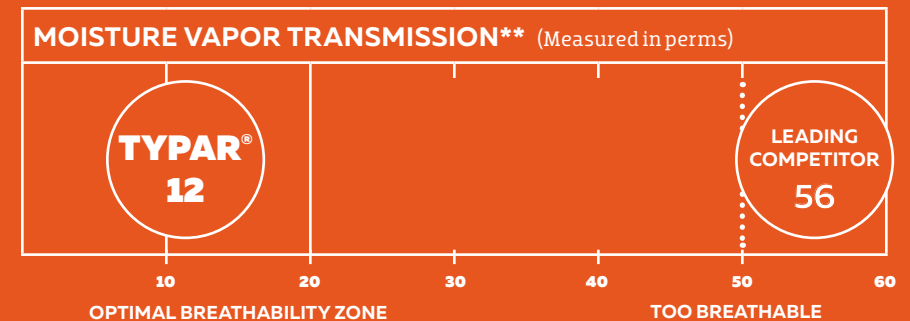

*Based on published results for tear strength according to ASTM D5733-99 testing.

No. **4**

BREATHABILITY, TOTALLY OPTIMIZED.

Water holdout is part of what makes TYPAR BuildingWrap tough. But the ability to let moisture vapor escape the wall is what makes it smart. With TYPAR®, you get the optimal balance of holdout and breathability. Which is exactly what you want to prevent mold and rot.

**Based on published results according to ASTM E96-05 Procedure A testing. Competitor results based on published data.

No. **5**

BUILT-IN—AND UNRIVALED— UV STABILITY.

TYPAR® BuildingWrap can be left exposed for up to six full months with no degradation from sunlight. The same can't be said for the competitors. TYPAR® boasts UV inhibitors built-in to its very fibers. At its core, it's the ultimate in dealing effectively with deterioration from damaging rays.

UV EXPOSURE RATING	
TYPAR®	180 DAYS
LEADING COMPETITOR	120 DAYS

*TYPAR results based on AC38 testing. Competitor results based on published data.

No. **6**

SERIOUS RESISTANCE TO HARSH SURFACTANTS.

Chemicals and soaps from powerwashing are nothing to be trifled with. Not to mention, oils and tannins from natural woods, or bonding agents in stucco. TYPAR BuildingWrap is engineered to stand up strong to surfactants that may cause other weather barriers' performance to be left in a vulnerable state.

No. **7**

THE MOST COMPLETE SYSTEM. PERIOD.

Choose the TYPAR® Weather Protection System for total coverage and full confidence. Our lineup delivers the products and accessories that help you seal the entire building envelope tight at seams, rough openings, and penetrations. Bulk water? Commercial projects? No problem. Just ask.
